

The easy-to-use, imposition tool for digital Print-On-Demand

Origami virtual folding

“I am now more aware than ever of how important IMPress is to our workflow. It is also reassuring to know that we can count on Ultimate's technical support. We have a blistering fast infrastructure with IMPress at the heart of it.”

Key Benefits

A Professional Imposition Solution up to 22" x 29"

True PDF workflow and over 150 application filters for Mac, PC and UNIX included. Also supports PPD's, including the latest digital printers and digital presses. Set-up IMPress and you are ready to impose to any output device, including digital presses, imagesetters and platesetters.

Simple to use

IMPRESS speaks your language! The user-friendly interface walks you through the steps of imposition: Job Set-up, Master Layout, Document List and Print. Best Fit algorithms calculate imposition layouts automatically.

Automated to ensure your work flows!

IMPRESS can easily be integrated into a Trapeze (trapping) and UltimateFlow OPI (OPI Print Management) automated workflow.

With IMPRESS, "Hot Folders" automate the process of Imposition.

IMPRESS also offers automatic application of all Folding Marks. Users may define line thickness and length, automatic application of all Cut Marks and Color Bars. IMPRESS also includes automatic calculation of margins based on: standard, thin, or thick paper weights.

Origami

Origami, Ultimate's unique virtual folding tool, folds your sheet on screen, automatically placing pages in the proper imposed order and orientation. Origami creates your templates and automatically inserts cutting and folding marks.

Flexibility

- No limitation to the number of pages in a single document
- Full control over page positions, bleed control (excess image), and page scaling
- Full size Master Layout Edit window
Ability to mix PostScript files from multiple DTP applications on the same plate, including Xerox's TIFF to PS utility
- Supports TIFF 6.0 (RunLength encoding & CCITT)
Full support for punch systems integrated in today's imagesetters

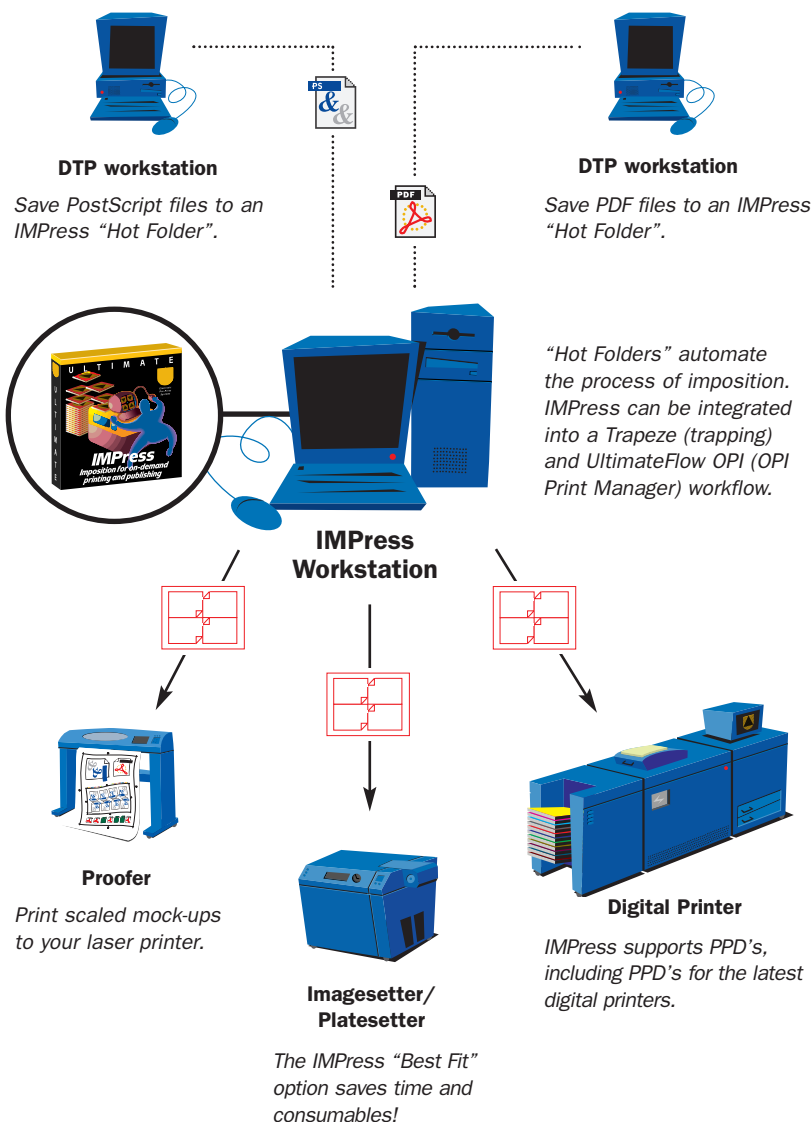

Choose your imposition for stapled brochures, perfect bound, punched for wire-O or spiral bound documents and right-side binding

You may use the Stahl folding library master templates included with IMPRESS or create your own

IMPRESS automated Hot Folder Workflow

Professional imposition features, are presented in a easy to use interface. Automated features ensure a smooth workflow for Pre-press and in-house corporate publishing.

Innovation for the Growing Market

IMPRESS is designed to meet the requirements of the growing Print-On-Demand and variable data publishing markets. Running on a Mac or Windows, IMPRESS is the industry's easiest and most automated imposition software—period.

For Small, Medium or Corporate Printers

IMPRESS provides the features and convenience that printers need in an imposition software. Various "helpers" including *Best Fit*, automatic calculation of master layouts and *Origami*, Ultimate Technographics' revolutionary virtual paper folding system for desktop imposition, ensure that even a novice will be printing booklets in minutes.

For Label Printers

IMPRESS offers instant Step & Repeat, RIP once—Step many, automatic insertion of crop marks, and full anamorphic distortion for flexographic printing.

For Document Publishers

IMPRESS provides access to PostScript and PDF files created from virtually any application, in any combination, within a single job. IMPRESS also offers full support for the latest line of digital copiers, such as the DocuTech and DocuPrint 6135 from Xerox. IMPRESS incorporates a job control window (Job Ticket) to fully automate processing functions for most digital printers such as Xerox, IBM, etc.

For Digital Publishers & Printers

IMPRESS offers full support for the latest in digital press technology. It outputs to AGFA's Chromapress, Indigo's E-Print, Xerox DocuColor, Xeikon presses, and Heidelberg Quickmaster DI.

For The Growing Business

Ultimate Technographics provides an easy way to automate the preparation of digital documents for printing and provides an easy, economical upgrade path to Imposstrip for larger imposition needs.

Quick Proofing

For proofing, just print scaled mock-ups to your laser printer, IMPRESS replaces the page contents with imposition information such as sequence numbers, folio numbers, position adjustment values, specific bleed values....
